PROFILE SUMMARY

Software engineer with 1.5 years of experience in developing scalable web applications and delivering data-driven solutions. Enhanced user engagement and optimised system performance through innovative design and efficient workflows. Skilled in problem-solving and collaboration, committed to driving impactful results and contributing to organizational success.

SKILLS

- **Key Skills:** Frontend Development, Backend Development, Problem Solving, Cross-functional Collaboration, Team Leadership, ETL, Insight Derivation, Performance Optimization, Communication Skills, Continuous Learning.
- **Technical Skills:** React, JavaScript, PHP, Express.js, MongoDB, Node.js, Python, Django, Flask, MySQL, RestfulAPI, Power BI, PostgreSQL, AWS, WordPress, HTML, CSS, Bootstrap, DBMS, Data Structure and Algorithms, Object Oriented Programming, Statistics, Excel, Soft Computing.
- **Certifications:** MERN full stack development course, [Data Analysis](#), [Python Course](#) from Coursera and Cisco, SQL from HackerRank.
- **Awards/Activities:** Solved over 200+ Leetcode questions covering diverse domains such as Python3, MySQL, etc. Achieved 5-star coder status in Python on HackerRank, Awarded a 5 star reward in Problem solving on HackerRank.

WORK EXPERIENCE

Software Engineer | Limber Energy Pvt. Ltd.

Oct 2023 - Present

- Spearheaded front-end and back-end development, improving user experience and responsiveness by 35%.
- Collaborated with cross-functional teams to implement web security, reducing vulnerabilities by 40% through best practices.
- Optimized application performance, reducing load times by 30% and increasing overall efficiency.
- Conducted detailed debugging, testing, and documentation, enhancing code quality by 25% and streamlining future maintenance.
- Delivered scalable and secure web solutions, ensuring 99% uptime and high user satisfaction.
- Continuously researched and adopted emerging technologies to drive innovation and improve development processes.

PROJECTS

School- Web Application

- Worked with a team to build a custom web application for a school.
- Designed and customized the site to highlight the school's vision, curriculum, and facilities.
- Integrated features like admission forms, event updates, staff directories, and student portals.
- Tested and optimized the site for responsiveness and ease of use across devices.
- Delivered a functional platform that improved communication between the school, students, and parents.

Agricraft Community FPC

- Developed a semi-government web based application for Agricraft Community FPC to support society-based selling and agricultural services.
- Implemented features for member registration, product listings, and order management.
- Implemented event-driven architecture in Node.js using event emitters for real-time updates.
- Optimized website performance for fast loading times and seamless user experience.

Online Book Store

- Collaborated with a team to develop a tailored web application e-commerce platform for a client's bookstore.
- Customized user-centric approach to align with the client's specific requirements and business goals.
- Integrated key features, including advanced search filters, shopping cart and checkout functionality, and secure payment gateways. and used MongoDB for scalable product listings.
- Conducted testing, debugging, and optimization to ensure seamless performance and responsiveness.
- Implemented RESTful APIs, integrated MongoDB for product storage, and used JWT for authentication.

EDUCATION

- Bachelor of Technology in Information Technology | ABES Engineering College | 87%
- 12th | Arya Mahila N.M.Model School | 80.8%
- 10th | Arya Mahila N.M.Model School | 78%

Aug 2019 - July 2023
April 2017 - Mar 2018
April 2015 - Mar 2016
